

Round wooden silo 100m³, in Wetzikon

Switzerland

Construction data

Product/Component	Round silo, Control technology
Model/Type	Galvanised steel roof platform, Fill funnel swivel-mounted, Oak knocker, Galvanised steel ladder, Spotlight LED with motion detector, Valve and mirror heater, Galvanised and duplexed steel construction, Loading mirror
Volume	100
Stocked goods	Salt

Project details

Client:	Gemeinde Wetzikon ZH
	Schweiz
Architecture:	Steiner AG
Project type:	Wooden silos
Construction:	2021
Locality:	Wetzikon
Country:	Switzerland

Information Silo

Silo volume:	100m ³
Silo height:	13,85m
Total height:	4,70m
Passage width:	3,675m
Total height:	4,400m

Project description

New construction of the depot for the public utilities and the maintenance service of the town of Wetzikon. Blumer Lehmann was responsible for the planning, production and assembly of the round wooden silo with a capacity of 100m³. To match the new building with its dark façade, the spruce wood of the silo was also treated with a dark wood preservative glaze. The black façade reflects the history of the area; in the past, gas was extracted from hard coal here.

Round wooden silo 100m³, in Wetzikon

Switzerland

Round wooden silo with valve and mirror heater, oak knocker, fill funnel swivel-mounted

Galvanised and duplexed steel construction

Galvanised steel roof platform
