Silo height:	15,60m
Total height:	6,20m
Passage width:	5,25m
Total height:	4,20m

## Project description

A new winter service station with three large round wooden silos, each with a volume of 200m<sup>3</sup>, has been built in Zernez in the canton of Graubünden. The wooden silos are set up for the storage of salt and grit and can already be filled in summer due to their size.

We were responsible for the planning and realisation of the silos as well as the plant technology.
