Kallnach, CH

Project details

Client	Private
Project type	Agriculture construction
Construction type	Wood element construction
Services	Timber construction
Own products	Fassaden
Construction	2018
Locality	Kallnach
Country	Switzerland

Custom-made concept

The chicken farming hall in Kallnach was built in a very short space of time. This was despite the large-scale dimensions (67 m in length and 25 m in width), which yield a usable stall area of 1,200 m². The covering is made from sandwich panels and is clad with a pressure-treated formwork in spruce. Our partner Globogal AG planned and implemented the custom-made concept for the barn equipment.
