

Schilliger Holz AG production hall

Küssnacht SZ, CH

Schilliger Holz AG production hall

Küssnacht SZ, CH

Project details

Client	Schilliger Holz AG
Architecture	Blumer-Lehmann AG
Project type	Commercial and industrial
Construction type	Wood element construction
Services	Timber construction
Construction	2019
Locality	Küssnacht SZ
Country	Switzerland

Schilliger Holz AG production hall

Küssnacht SZ, CH

Hall construction in large dimensions

Following a fire in 2017, Schilliger Holz in Küssnacht needed a new replacement building for their panel factory, warehouse and offices. We started on variation studies for the replacement building early on. This was followed by optimisation proposals for the hall design and groundwork for the planning application. Once the contract was awarded, the timber construction for the industrial hall with a floor area of around 7,000 m², a building volume of 90,000 m³ and facade surface area of 2,400 m² was built within four months.

As joint general contractor, we were responsible for the entire building shell in addition to the timber construction. It was therefore our task to draw up the detailed plans of the building shell and the design statics of the supporting structure for the new building. We produced, supplied and installed the supporting structure with its 36 m long beams, the wall elements and roof components, as well as all the windows, skylights, doors, sandwich panels, roofing and Douglas fir facades.

Schilliger Holz AG production hall

Küssnacht SZ, CH

An impressive new building in a prefabricated design.

The UVood-treated facade gives the building an elegant appearance.

The fascinating world of wood

Schilliger Holz AG production hall

Küssnacht SZ, CH

An effective installation: Douglas-fir boards form the building's facade.
