Client	Private
Architecture	Gemperli Stauffacher Architektur GmbH
Project type	Hotels and restaurants, Leisure and sport
Construction type	Wood element construction
Services	Timber construction
Construction	2012
Locality	Egnach
Country	Switzerland

New-build reception and main building

A new reception and main building including sanitary facilities was built at Wiedehorn/Seehorn camp site in Egnach. The facade is made from woven willow, enabling it to blend in seamlessly with the surroundings near Lake Constance and living up to the name of the location ('Wiede' means 'willow braid' in German). The wooden letters are part of the architectural concept and are a playful addition to the environment.
