Construction	2017
Locality	Niederhelfenschwil
Country	Switzerland

A timber house with charm

Having already been responsible for the initial designs, we subsequently took care of the detail planning and implementation of the timber construction. The panoramic windows and interior design dominated by wood produced a bright living space, which automatically creates a pleasant ambiance. With boards of different sizes and light grey window frames, the house's facade has a decidedly modern look that combines nature with contemporary living.
