A wooden loop

Buchrain, CH

An art project by Urs Twellmann

Artist Urs Twellmann designed the Loop sculpture titled 'Loop' for corporate client Jowat in 2014. The idea for the sculpture was inspired by the artist writing the name Jowat several times in succession. The initial draft was developed into a manual sketch, before various images clarified the artist's intention. Our company initially created a parametrised 3D model, which could be viewed in 3D from all sides and served as a decision-making basis for the subsequent execution of the sculpture.
